

# SUSTAINABILITY POLICY

*"At [Hyperdrop](#), we are committed to minimising our impact on the planet and believe that responsible and sustainable business practices come first. As a small, growing business we are continually making improvements and learning how to reduce our carbon emissions.*

*Currently, 50% of our fleet are electric vehicles (EVs), and as technology evolves, we plan to evolve with it and exclusively use EVs by 2030.*

*Our goal is to be a sustainability leader within the TV & Film industry, in turn ensuring our clients are confident they are choosing reliable, sustainable services."*
